

Softswim B 1/2 Gallon

Brand: Bioguard

Product Code: 22852BIO

Availability: In Stock

Weight: 0.00oz

Dimensions: 0.00ft x 0.00ft x 0.00ft

Price: \$37.99

Description

1 - 1/2 Gallon of Softswim B

What it does

Controls bacteria growth in biguanide sanitized pools.

Features

- 20% Polyhexamethylene biguanide hydrochloride (PHMB)
- pH~7.5
- Compatible with SoftSwim[®] systems
- Do not use in chlorine, bromine, Mineral Springs[®] or saltwater systems
- Polymeric action attracts contaminants
- Easy to use and measure as a liquid
- Effective over wide pH range
- pH neutral
- Non-staining, Non-corrosive
- Stable in sunlight

- Designed to be used with hydrogen peroxide as oxidizer

Benefits

- Convenient and simple application
- Water is gentle feeling to skin and eyes
- No chlorine odor or dry feeling after swimming
- Excellent aid to filtration

Directions for Use

Directions for Use

Initial Treatment

1. Backwash or chemically clean pool filter. Check pool pH; adjust to 7.2-7.6 if necessary.
2. Add SoftSwim[®] B to give a content of 50 ppm (1/2 gallon product/10,000 gallons of pool water).
3. After 24 hours, check pH and SoftSwim[®] B concentration with test strips and adjust if necessary.

Routine Maintenance

1. Every week, check SoftSwim[®] B concentration and pH.
2. Maintain SoftSwim[®] B concentration at about 50 ppm. If concentration falls 10 ppm or more, add a top-up dose. The level should not be allowed to drop below 30 ppm.
 - A maintenance dose of 1 pint per 10,000 gallons will raise the level approximately 10 ppm.

NOTE: SOFTSWIM[®] B AND CHLORINE ARE INCOMPATIBLE. Consult your Authorized BioGuard[®] Dealer for information on how to deal with accidental chlorination.
