Description

1 Quart - Pool Opening Complete

What does it do

BioGuard® Pool Opening Complete® is the perfect way to get pools off to a great start for the season. This special variation of the Pool Complete® family is designed to work effectively in opening conditions and quickly clear pool water of any winter filth. The formula is optimized for spring opening. Upon application, a small white plume is briefly visible as the product is added. There may be a slight amount of foam due to the waterline cleaner. Foam dissipates within 30 minutes.

Features

- 5-10% aluminium sulfate
- pH - 1.7 - 2.1
- 3-in-1 concentrated formula
- Multi-functional
- Compatible with chlorine, bromine, Mineral Springs®, saltwater, and

Benefits

- Cleans pool water
- The first step to start the pool season
- Helps clear pool water
- Helps clean the waterline
- Removes contaminants that may have entered the pool over the winter

Directions for Use

Directions for Use

Prior to Application

Make sure all pool equipment is working properly, including pump, filter, skimmer and heater. If needed, backwash and/ or clean filter according to manufacturer's directions. Adjust water balance, apply chosen shock product, and add initial dose of algicide before adding Pool Opening Complete.

At Pool Opening

1. Shake product well before using. To help clear water and make opening easier, apply 1 quart per 20,000 gallons.
2. Apply slowly and directly into water while walking around deep end of pool.
3. Run the pump for at least 12 hours after application.
4. Begin BioGuard[®] Care System and continue adding Pool Complete[®] each week for best results
