

Saltscapes Scale Defender Quart

Brand: Bioguard

Product Code: 16012BIO

Availability: In Stock

Weight: 0.00oz

Dimensions: 0.00ft x 0.00ft x 0.00ft

Price: \$25.99

Description

1 Quart - Saltscapes Scale Defender

Features

- 30 - 50%* maleic acid copolymer
- 5 - 10%* maleic acid
- pH < 1
- Compatible with saltwater systems
- Binds calcium-based scale crystals to prevent clumping on cell surface

Benefits

- Protects against damaging scale for efficient, long-lasting cell performance
- Increases the efficiency of the cell
- Increases the longevity of the cell
- Results in a cleaner cell that won't have to work as hard to keep your chlorine

level within the ideal range.

What it does

The environment within your chlorine generator cell can cause chalky white calcium scale deposits to form on your cell's walls over time, decreasing the chlorine output. SaltScapes® Scale Defender binds to calcium-based scale crystals to prevent them from sticking together and clumping on surfaces. This results in a cleaner cell that won't have to work as hard to keep your chlorine level within the ideal range.

Directions for Use

Directions for Use

1. For Spring Opening or startup with your chlorine generator, add 1 qt. per 10,000 gallons directly to the pool with the pump running.
2. Apply this same amount monthly for maintenance.
3. Swimming may resume 15 minutes after application.

SaltScapes® Scale Defender is not needed in the Mineral Springs® System. Scale preventative is built into Mineral Springs® Beginnings® and Mineral Springs® Renewal®.
