What it does

- Quick Dissolving Pool Shock
- Provides Crystal Clear Water
- For Use in All Pools
- No Need to Pre-Dissolve

Directions for Use

Directions for Use

To Shock Clear Water:

- Add 1 lb per 12,000 gallons into the deepest pool area while the filter and pump are operating.
- Do Not pre-dissolve & Do Not apply through skimmer or chemical feeder, Do

Not mix with other chemicals; a violent reaction may result

- Wait at least 15 minutes after product application before entering pool.
- To prevent damage to pool surface, use an appropriate pool brush to disperse any undissolved granules which may have settled to the bottom of the pool.
- Operate pump and filter continuously for 4 - 8 hours after product addition
- Apply more product after heavy use, high temperatures or rain. For best results, shock pool weekly.

To Kill Algae:

- Brush pool surface while filter and pump are operating.
- Add 1 lb per 12,000 gallons directly to the pool water in areas of heaviest algae growth, operate filter and pump for 24 hours
- Repeat brushing
- Do not enter the pool until the free available chlorine residual is 1-4 ppm
- Product can be re-applied after 72 hours if necessary.

To Close Pool:

- Backwash Filter following manufacturer's directions.
- Apply this product at a rate of 1 lb per 6,000 gallons into the deepest pool area while the filter and pump are operating.
- To prevent damage to pool surface, use an appropriate pool brush to disperse any undissolved granules which may have settled to the bottom of the pool.
- Apply an appropriate winter algaecide after addition of this product.
